DETAILED ACTION

Allowable Subject Matter

Claim 1-21, 24-30, 32, 33, and 37-52 are allowed.

The following is the examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious "measuring the voltage across one or more of the areas of photoconductive material using at least two second electrical contacts that are different than the at least one pair of first electrical contacts, a change in the measured voltage being indicative of a change in illumination," in combination with the rest of the limitations of the claim.

As to claim 18, the prior art of record, taken alone or in combination, fails to disclose or render obvious "input electrodes beyond each of the one or more areas of photoconductive material, for driving current, provided by a source, through the one or more areas of photoconductive material; output electrodes beyond each of the one or more areas of photoconductive material, for sensing a voltage drop across the areas of photoconductive material, the input electrodes being different from the output electrodes [...] a change in voltage being indicative of change in the optical intensity distribution," in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled **"Comments on Statement of Reasons for Allowance."**
